

# Development Start Page for TransIRC.Chat Services

Welcome to the central hub for tracking the development of all services powering TransIRC.Chat.

This page helps us organize, plan, and document progress on the key components that make up our community infrastructure.

## Development Areas

- \* **Wiki** Manage and improve the TransIRC.Chat Wiki, including plugins, templates, and documentation workflows.
- \* **IRC Server (Ergo)** Development and maintenance of the Ergo IRC server, including configuration, plugins, and security.
- \* **IRC Bot** Ongoing development of the IRC bot that automates moderation, announcements, and social integrations.
- \* **Blog** Enhancements and content strategy for the community blog platform.
- \* **Website** Front-end and back-end improvements to the TransIRC.Chat main website, including UI/UX.
- \* **Web UI** Development of the interactive web interfaces, such as the web-based IRC client and social tools.

## Goals and Planning

Each section should include:

- Current features and status
- Planned features and improvements
- Issues and bug tracking
- Resources and documentation links

Feel free to update this page and its subsections regularly to keep everyone informed and coordinated.

---

For community members interested in contributing, check out the individual sections to find tasks and join discussions.
